# Company Overview: Powering Progress

Bravon is driven by innovation, reliability, and a passion for excellence in every project we undertake. Bravon Technical Services is a Karachi-based engineering solutions provider specializing in high-quality Mechanical, Electrical, and Plumbing (MEP) services, Industrial Contracting, Instrumentation & Controls, and Renewable Energy Systems. Founded by a team of expert engineers.

## Head Office

B-111, Al Ahad Pride, Gulistan-e-Jouhar, Block 14,  
Karachi, Pakistan

## Leadership

**CEO:** Engr. Atif Zaeem

**Partner:** Syed Qasim Ali Shah

 Our foundation is built on technical expertise and a commitment to delivering reliable, future-proof solutions for our clients.

# Our Core Services: Building Essential Infrastructure

We offer a comprehensive suite of services designed to keep industrial and commercial operations running smoothly, efficiently, and sustainably.

## MEP (Mechanical, Electrical & Plumbing)

Complete solutions covering the design, installation, and maintenance of essential systems for industrial and commercial projects.

## Instrumentation & Controls (I&C)

Advanced automation and control systems that enhance process reliability and accuracy, helping industries improve productivity and minimize downtime.

## Contracting

Turnkey contracting services, managing projects from design to commissioning, including electrical, civil, and mechanical works.

## Erection & Maintenance

Expert installation, erection, and maintenance services for industrial and commercial facilities, ensuring long-term equipment reliability.

## Solar Power Systems

Sustainable solar system design and installation services for residential, commercial, and industrial clients to reduce energy costs.

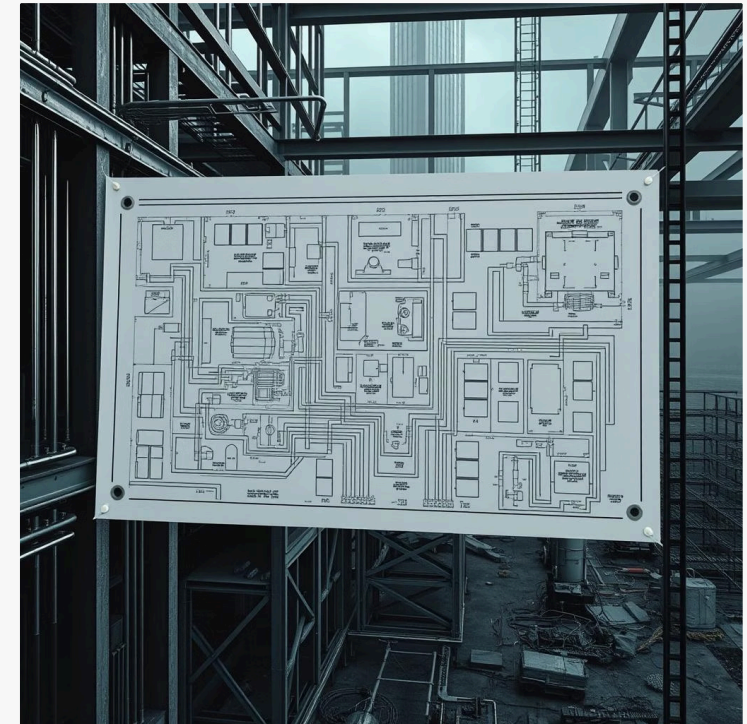

## CCTV & Security Systems

Modern surveillance and access control solutions for 24/7 security coverage in homes, offices, and industrial facilities.

# Focus Area: MEP Excellence

Bravon Technical Services offers complete MEP solutions, covering the design, installation, and maintenance of systems for both industrial and commercial projects. We ensure all systems are energy-efficient, safe, and compliant with international standards.

- **Electrical Systems:** Design, wiring, and load management.
- **HVAC:** Installation and ducting for climate control.
- **Plumbing:** Water supply and drainage systems.
- **Safety:** Firefighting and safety installations.

# Renewable Energy: Embracing Solar Power

As part of our renewable energy initiative, Bravon delivers solar system design and installation services that promote sustainability. We help clients reduce energy costs while supporting green energy adoption in Pakistan.

## **Residential, Commercial, and Industrial Solutions**

Tailored solar setups for every scale of operation.

## **On-Grid and Hybrid System Setups**

Flexible solutions for connecting to the main grid or operating independently.

## **Battery Backup and Inverter Installations**

Ensuring reliable power even during outages.

## **Energy Audits and Load Assessments**

Optimizing system size for maximum efficiency and savings.

# Specialized Industrial Services

Beyond core MEP, Bravon offers highly specialized services critical for heavy industry and plant operations.

## 1 Boiler Engineering & Certification

A-Class certified boiler operations, inspections, and compliance assurance. Safety audits and performance optimization for industrial boilers.

## 3 Erection & Commissioning

End-to-end erection of industrial plants and mechanical systems. On-site supervision and quality control during installation phases.

## 2 Industrial Plant Fabrication

Custom fabrication of pressure vessels, pipelines, and structural components. Welding and metalwork aligned with international standards.

## 4 Maintenance & Overhaul Services

Preventive and corrective maintenance of boilers and mechanical systems. Emergency repair and troubleshooting for plant machinery.

# Leadership Driving Excellence

Our leadership team combines deep technical knowledge with extensive practical experience, ensuring every project meets the highest standards.

## **Engr. Atif Zaeem – CEO**

M.E in Manufacturing and Industrial Management and B.E in Elect. with extensive experience in Industrial Projects Execution, System Design, Maintenance as well as Plant Operations. His leadership ensures Bravon's technical services excellence and customer satisfaction.

## **Syed Qasim Ali Shah – Partner**

Certified A-Class Boiler Engineer with expertise in fabrication, erection, and maintenance of industrial plants. His practical knowledge and commitment to quality drive the company's operational success.

# Vision & Mission: Our Commitment

We are focused on delivering high-value technical solutions that combine innovation, safety, and cost-effectiveness while building long-term partnerships with our clients.

## Vision

To be a recognized leader in engineering, renewable energy, and automation services across Pakistan.

## Mission

Deliver high-value technical solutions that combine innovation, safety, and cost-effectiveness while building long-term partnerships with our clients.

# Key Industrial Projects: Proven Success

Bravon Technical Services has successfully delivered numerous industrial and commercial projects, ranging from solar plant installations to MEP infrastructure to facility maintenance and numerous industrial projects. Our project teams have supported leading industrial clients in sectors such as manufacturing, pharmaceuticals, energy, and construction.

# Why Choose Bravon? Your Partner for the Future

When you partner with Bravon, you gain access to a team dedicated to your success, ensuring reliable and sustainable operations.

**Experienced  
Engineering Team**

**Commitment to Quality  
and Safety**

**Timely Project Delivery**

**Innovative and Sustainable Solutions**

**Comprehensive After-Sales Support**

Let's Build the Future Together
